## Second-level subheadline

Times New Roman, 12 points, bold, single line spacing

Standard Textbody

Times New Roman, 12 points, block format, single line spacing

## Tables

Place tables as close as possible to where they are first referred (**Table 1**). The tables must be numbered consecutively and titled above the table. Separate tables from the textbody by at least one line above and below.

**Table 1:** Numbers and names

Number	1	2	3
Name	A	B	C
Trade name	D	E	F

## Figures and Photographs

Place the figures as close as possible to where they are first referred (**Figure 1**). Make sure that all figures are of highest quality and that all text in graphs and figures are large enough to read. Every figure must be referred to (**Fig. 1**) in the text and all figures are to be numbered in the sequence in which they are cited.

### Equations

Equations should be centered and separated from the textbody by a line above and below. The equations should be numbered consecutively in parentheses at the right-hand margin and all symbols and subscripts must be defined the first time they are used:

$$E = mc^2 \quad (1)$$

### References

References should be cited in the text as follows [Fri02], i.e. enclose an abbreviation of the authors name and the year of publication in square brackets and they should be collected in alphabetical order at the end of the manuscript under the heading "References":

- [Fri02] U Fritsching, K. Bauckhage: *SDMA authors guide to manuscript preparation*, Journal authors guides 37 (2002), 1-2
- [Sin96] A.R.E. Singer: *Recent Development and Opportunities in Spray Forming*, Kolloquiumsband Sprühkompaktieren, Universität Bremen, Band 1 (1996), 123-140.

### Submission of manuscript

The manuscript should be submitted in electronic form (**one** Word document please) to:
